

### **Abstract of the Disclosure**

The invention disclosed consists of a process that consists of the steps capturing and collecting digital images of original art works, sorting those images into working sets or groupings, distributing and displaying the digital imagery of the sets or groups in a number of commercial venues and private residences via a slide show utilizing high-resolution video media including television sets and projection onto walls or screens. This process will serve to 1) expose artists' works to a broad audience widely distributed throughout a broad geographic area, 2) entertain its audience; and 3) introduce that audience to dazzling new 'high-definition' displays, generally defined as having XGA resolution or higher.
